

ADMINISTRATIVE MEMORANDUM
VPAA 09-01
July 24, 2009

**SUBJECT: Department of Nursing and
 Department of Psychology**

Effective July 31, 2009, both the Department of Psychology and the Department of Nursing will be in the College of Professional Studies rather than the College of Natural Resources and Sciences.

This organizational change was initiated to bring the size and scope of the colleges more into alignment with one another, while at the same time locating these two clinically-focused departments among other professional programs. The process was broadly consultative, involving collaborative discussions among the departments and the colleges, with the support of the staff in my office.
